

1. Export a button with name **test.button**:

Go to the "controls library" and select your button. Copy & paste it in other location, then, rename it (F2). In this example it is used a rectangular button: test.button.

C:\Program Files (x86)\Ecler\EclerNet Manager\controls library

Example: C:\Program Files (x86)\Ecler\EclerNet Manager\controls library\large\buttons

- button_large_black_rectangular_01.button
- button_large_black_rectangular_02.button
- button_large_black_rectangular_led_green_01.button
- button_large_black_square_01.button
- button_large_black_square_led_green_01.button
- button_large_black_square_led_red_01.button
- button_large_black_square_led_yellow_01.button
- button_large_grey_rectangular_led_green_01.button
- button_large_yellow_square_backlight_01.button
 - 2. Change the file extension to ".zip":

Rename (F2) the file: test.zip.

3. **Unzip** the folder.

This folder contains 2 files: ".png" and an ".xml".

4. Edit the ".png" file.

Use your favourite graphics editor and save the file.

Original ".png" file:

Edited ".png" file:

- 5. **Create again a zip folder** with the ".xml" and the new ".png" file: test.zip.
- 6. Change file extension again: test.button
- 7. Import your new button to your project!
