

## #eMIMO1616universe

eMCONTROL1 + WPaMIX-T

eMPAGE

## Your eMIMO1616 won't be same!

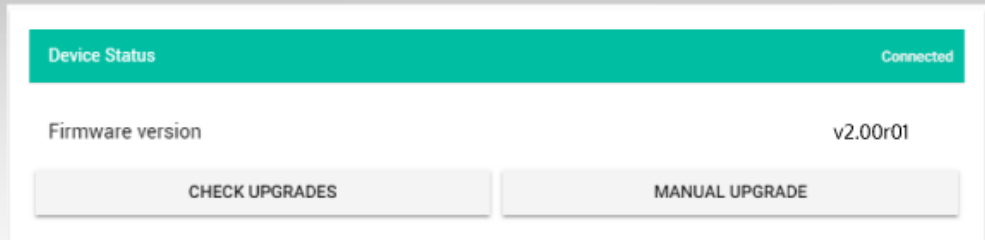

Dear <<Nombre>>,

We want to announce the latest news about #eMIMO1616Universe, including the latest firmware update and two new accessories whose features will allow you to have more control and management possibilities.

If you are in possession of an [eMIMO1616](#) then update your device with the new firmware and get the new accessories to achieve your matrix full potential.

## New features (firmware v2.00r01)

1. Automatic firmware update.
2. "Help" menu with useful information (requires internet connection): user's manuals, videos, images, etc.
3. "Remote Panels" menu to configure remote controls eMCONTROL1 and paging console eMPAGE from the essential range.
4. Add a logo to Pilot Panels.
5. New Pilot App version.
6. Usability improvements.

Try out the eMIMO Web App [online demo](#) to catch up with the updated functions and download the new firmware version clicking [here](#).

## eMCONTROL1

Digital wall control compatible with eMIMO1616 and settable from the embedded web app.

Selection of musical source, volume and three band EQ adjustments.

Minimal and aesthetic design.

Connect up to 8 eMCONTROL1 units to eMIMO1616 digital matrix.

eMCONTROL1 + WPaMIX-T + WPa25MBOX

## eMCONTROL1 + WPaMIX-T: the perfect match

Plug in both panels with a union cable provided by ECLER and connect the pair to the eMIMO1616 with a single CAT5 cable.

Mix a MICRO and a stereo RCA signals transmitting a mono balanced line output signal, along with the necessary control data and DC power supply.

## eMPAGE

Digital paging station compatible with eMIMO1616.

Programmable electronic ink for zone labeling, zone availability LED indicator and gooseneck microphone included.

Select up to 16 different zones for paging messages.

## 2 x eMPAGE + eMIMO1616

Programming of paging station(s) functionality from the web application embedded in the eMIMO1616 matrix: enabled paging zones, chime melodies, priorities, programmable keys, etc.

Two eMPAGE units, with different or equal priority levels, can work simultaneously on the same eMIMO1616 matrix.

We remind you that in our [Youtube](#) channel you'll be able to find all the information about eMIMO1616 digital matrix.
