WISPEAK – WIRELESS PRO AUDIO

Rail-mount / Pendant Loudspeaker

WiSpeak

GLOBE (Rail-mount version)

GLOBE (Pendant version)

PRODUCT OVERVIEW

WiSpeak GLOBE is a 2-way self-powered sphere loudspeaker with wireless audio reception and control capabilities under the control of the Master unit. It includes a 5" woofer and a 1" silk dome tweeter. 360° horizontal dispersion. Available in two versions - with light-rail compatible installation system (RM) and pendant installation system (PD).

KEY FEATURES

- 32W RMS power rating
- Dispersion 360° x 160° (HxV)
- ABS reinforced with fibreglass
- RM version lighting rail mount compatible (Compatible light rails: 4 wire 3 circuit track system such as Global Track Pro, Eutrac or compatibles)
- PD version with 2 x 5m steel cords for pendant installation
- RM version with universal, internal power supply, taking mains AC from the lighting rail bracket (100-240VAC 50-60Hz)
- PD version with Euroblock power supply connection
- 1x WiSpeak wireless audio signal received, from the transmitter it is paired to
- Front panel UNPAIR control and LED indicators
- 12 meters maximum range, open space, for the WiSpeak wireless network (from the transmitter to each receiver)
- Available in white (RAL 9003) and black colour (RAL 9005)

APPLICATIONS

- Retail
- Hospitality
- Education
- Corporate
- Sports and wellness

¹10dB below the sound pressure level at specified sensitivity

²6dB below the sound pressure level than that at the direction of maximum level, Max. angle between 1 kHz and 4 kHz.

³Measured on-axis, far field and referenced to 1 meter by inverse square law. Average from 100 Hz to 10 kHz.

⁴Calculated from sensitivity and power handling specifications, exclusive of power compression

WiSpeak features a unique & intelligent digital wireless transmission system: a solid and stable main channel is always used for the system's audio and control links, together with an alternative backup channel available. The system continuously monitors among 24 transmission channels to resolve the best backup channel option. In case the main channel's integrity is affected by third-party RF interferences, an instantaneous and clean (free of audio drops) switch to the backup one is performed.

Exceptionally, when working in environments with very high radio-electric contamination (presence of frequency inhibitors, WiFi networks saturation, etc.) WiSpeak might at times suffer disturbances in its proper functioning, like intermittent audio drops. In such circumstances, and along the system's installation and setup period, it might even be necessary to decrease the distance from the transmitter to each receiver to reach a solid and stable system performance along time.

Reconnection and pairing time also involve stabilization process to guarantee a solid and stable wireless communication. This time varies depending on adverse conditions described.

A&E SPECIFICATIONS

The receiver shall be a two-way self-powered sphere loudspeaker consisting of an 5" woofer and a 1" silk dome tweeter, lighting rail mount compatible (RM Version) or for pendant installation compatible (PD Version). The power handling should be 32 W RMS with a peak power handling of 128 W.

The effective frequency range (± 10 dB) shall be from 78 Hz to 22 kHz. The sensitivity shall be 91 dB considering 1 W input signal at 1 meter distance. The maximum continuous sound pressure level shall be 106 dB, while the maximum peak pressure level shall be 112 dB considering the loudspeaker's rated power. The coverage angle shall be a 111° conical coverage pattern.

The enclosure shall be made of ABS reinforced with fibreglass. It shall come available in both white (RAL9003) and black (RAL9005) colours. Mounting of the rail-mount speaker into the lighting rail shall be possible using the rail mount adapter compatible with light rails performing 4 wire 3 circuit track system such as Global Trac Pro, Eutrac or other compatible systems

Mounting of the pendant speaker into the ceiling shall be possible using the steel wire hanging. Connection shall be made via Euroblock 3C connector.

The loudspeaker shall have a diameter of 282 mm, a high of 331 mm and the weight shall not exceed 2,2 kg. It shall have data files available that can be used with EASE acoustic simulation software.

The loudspeaker shall be the ECLER WISPEAK GLOBE.
