Certified Online Training

ECLER

ECLƎR netmanager

10th Anniversary

EclerNet platform has been specifically designed to build your digital AV system. Since its release in December 2010, we have continued our innovation beside you by adding new features and growing the product range around it. Today, EclerNet is a full platform to create and integrate any kind of **#proAV** project with ease.

Thanks to the high demand we had on the first edition, we are announcing the next online certified training on EclerNet Manager!

This online training is especially designed for AV professionals, integrators, installers, technicians, engineers and programmers. After this webinar you will know how to build a digital AV system through **EclerNet Manager.**

What will you learn?

☑ Introduction to EclerNet Manager Software and Hardware.
☑ Network requirements and product range.
☑ EclerNet Manager Hardware and Applications:

DUO-NET PLAYER / MIMO88 / MIMO88SG / MIMO1212SG / MIMO4040CDN / NXA / WPNETTOUCH / PAGENETDN / DN44BOB / WP22DN

☑ EclerNet Manager Basics, Events and Presets, Pagers and Ducker, Remotes and UCP Server.
☑ UCP Panels: creation, controls, objects and examples.

Format

This online training will be presented in three consecutive days, each online session will have a duration of **2 hours plus Q&A.**

In case you want to access the certification:
BASIC CERTIFICATE will be granted by achieving more than 80% of answers correctly in both of our pop quizzes.
ADVANCED CERTIFICATE will be granted by achieving more than 80% of answers correctly in both of our pop quizzes plus the practical excersise assigned by the host. The deadline to send the exercise will be announce during the training.

April 27th, 28th and 29th
9.30 - 11.30 hrs (GMT+2)

For any requirement please write an email to webinars@ecler.com
