VEO-XWT44E

Wall Plate

On this #EclerWebinar we present the newest member of Ecler VIDEO SYSTEMS: **VEO-XWT44E** HDBaseT Wall Plate Transmitter

About this new wall plate, it supports real 4K video signals at 60Hz and HDR 10 format with a maximum bandwidth of 18Gbps. With bidirectional PoC feature, the transmitter can be powered by the receiver and vice versa. Among other amazing features, it offers the possibility of controlling a screen through RS-232 or CEC commands.

We will present you a full overview about VEO-XWT44E features, functionalities, and a quick use example to show you how it works. Are you a video specialist, an AV integrator or installer? Reserve your spot today!
